# First Progress Report ON Tanzania Without Poverty

A Plain Language Guide to:

The United Republic of Tanzania's  
Poverty Reduction Strategy Paper  
Progress Report 2000/01  
August 2001

January 2002

"Ownership of development policies and programs is not only an understandably nationalistic yearning, an inherent and sovereign right, but it also creates the most fervent disposition and conditions for hard work and for self-development, both at the national and at the local level ...

We have learnt the importance of ownership and co-ordination, and the pitfalls of donor unilateralism and multilateral dictation, however well-meaning or sublime!"

(President Mkapa of Tanzania)
