REGIONAL INTEGRATION IN SOUTHERN AFRICA

Overview of Recent Developments

Lolette Kritzinger-van Niekerk Emmanuel Pinto Moreira

December 2002

The findings, interpretations, and conclusions expressed in this paper are entirely those of the author(s). They do not necessarily represent the views of the World Bank Group, its Executive Directors, or the countries that they represent and should not be attributed to them.

Foreword

This study is published by the World Bank in its informal series of Discussion Papers on regional integration in Africa, and specifically covers recent developments in Southern and Eastern Africa. In accordance with the April 2, 2001 Board Presentation on the Africa Region's greater focus and new approach to regional integration, the teams for regional integration in southern and eastern Africa have:

- renewed interaction with the Southern Africa Development Community (SADC), the Common Market for Eastern and Southern Africa (COMESA) and the East African Community (EAC) in order to establish their objectives and priorities for regional integration in their respective arrangements;
- undertaken an update of the Bank's knowledge base on the status of and prospects for regional integration in southern and eastern Africa.

The purpose of this background paper is to inform the Bank and others about challenges and opportunities for strengthening socio-economic integration in southern Africa, and specifically in SADC, by:

- highlighting some salient political, socio-economic and geographical features of the sub-region,
- giving an overview of recent developments in regional integration in southern Africa, and
- giving an indication of selected international development partners' support for regional integration in sub-region.

Without the benefit of 'regional' economic and sector work, the paper provides a 'broad-brush and impressionistic' picture of selective developments within the southern African region. Each of the issues covered requires further study, while some other important issues might not have received attention at all.

The paper finds that the political, institutional and socio-economic environment between countries in the southern Africa region is heterogeneous in the extreme, converging in policies, but not necessarily in outcome. Together with the multiple memberships of countries in regional integration arrangements, this is posing particular challenges and opportunities for regional cooperation and integration efforts and no less to development partners' support for integration in the sub-region. Currently, SADC finds itself in the midst of major reforms of its institutions, processes and management as well as of its regional integration agenda. One of the outcomes of SADC's restructuring process would be a regional indicative strategic development plan. This plan would also be important for the Bank in designing a responsive regional integration assistance strategy with the sub-region

We hope that this paper would contribute not only to updating the Bank's knowledge base on regional integration in the southern and eastern Africa region, but also to wider discussions and debate that will help the sub-region move forward towards a better future.

Marie - Françoise Marie - Nelly Program Manager Regional Cooperation and Integration, SSA The World Bank December 2002

This is an informal study by World Bank staff, published for discussion purposes. It is not an official World Bank document.

Lolette Kritzinger-van Niekerk (AFTP1), Task Team Leader, and Emmanuel Pinto Moreira, Consultant, prepared this report as a broad introductory and background work on regional integration in southern Africa for the World Bank to promote its dialogue aimed at a coherent support initiative for regional cooperation and integration in the subregion. Members of the southern Africa team provided valuable inputs for and comments on earlier drafts.
