WORKING REPORT MEASURING HIV STIGMA: RESULTS OF A FIELD TEST IN TANZANIA

JUNE 2005

This publication was produced for review by the United States Agency for International Development. It was prepared by the Tanzania Stigma-Indicators Field Test Group on behalf of Social & Scientific Systems, Inc., under The Synergy Project through Contract HRN-C-00-99-00005-00.

Acknowledgments

This work and the resulting report were facilitated through the contributions of numerous individuals and members of the study communities.

We give special thanks to all the respondents who so willingly shared their time and insight with us on such a sensitive topic. Without them, this work would not have been possible.

The project teams in Tanzania—field, data entry, and administrative—require particular recognition. Their hard work, diligence, and dedication ensured the success of this project. Thanks go to Jeremia Willison Matiko, Field Coordinator; Elizabeth Semwaiko, Field Enumerator; Fabiola Upendo and Happiness Manase, Data Entry Clerks; Zawadi Shomari, Lucy Francis, Irene Lema, Gloria Karungula, Isack Abdiel, Katikirro Mujaya, and Temina Abeid, Interviewers.

We are grateful for the support and direction from many institutions and individuals, both in Washington and in Tanzania. In particular, the core members of the USAID Stigma and Discrimination Indicator Working Group (S&DIWG): Cameron Wolf and Billy Pick (USAID), Julie Pulerwitz (Horizons), and Lane Porter (POLICY Project).

This work would not have been possible without the funding and support of USAID and the Synergy CTO, Neen Alruz.

A special thanks also goes to Jennifer Ramsey at ICRW for her administrative support in pulling this report together. We are particularly grateful for her calm, efficient, and unflappable demeanor, despite the extensive number of tables and daunting length of this report.

We would also like to thank the Synergy editors for undertaking the final editing and formatting.

WORKING REPORT MEASURING HIV STIGMA: RESULTS OF A FIELD TEST IN TANZANIA

Measuring the Results of HIV Stigma Field Test in Tanzania is the result of collaborative efforts among the Tanzania Stigma-Indicators Field Test Group, which includes the following individuals and organizations:

- Laura Nyblade and Kerry MacQuarrie, International Center for Research on Women
- Fausta Phillip, Gideon Kwesigabo, Jessie Mbwambo, and John Ndega, Muhimbili University College of Health Sciences
- Charles Katende and Elaine Yuan, The Synergy Project/Social & Scientific Systems, Inc.
- Lisanne Brown and Anne Stangl, MEASURE Evaluation/Tulane University

The authors' views expressed in this publication do not necessarily reflect the views of the United States Agency for International Development or the United States Government.
